Education

Iowa State University, Department of Statistics 2018-Present

Ph.D. Student in Statistics.

Universidad Nacional de Rosario, Department of Statistics 2014-2017

[Master of Science in Applied Statistics](#). GPA 9.2/10 ($\sim 3.9/4$).¹

Thesis: “*Evaluating Forecast Accuracy of GARCH Volatility Models Applied to Daily Stock Prices in Argentina.*”
([Thesis](#); [Slides](#))

Research performed while working full-time.

Pontificia Universidad Católica Argentina, Department of Administration 2006-2010

Bachelor of Business Administration, *summa cum laude*. GPA 8.9/10 ($\sim 3.9/4$).¹

Additional Ph.D.-level Coursework

Universidad Nacional de Rosario, Department of Statistics 2016-2017

Completed three courses: Bayesian Statistics, Measure Theory and Probability, and Panel Data Econometrics.²

Additional Master-level Coursework

Universidad Nacional de Rosario, Department of Administration 2011-2014

[Master of Science in Finance](#). GPA 8.5/10 ($\sim 3.7/4$).¹

Completed coursework requirements for M.Sc. in Finance.

Research Interests

Bayesian statistics, computational statistics, time series analysis, state-space models (continuous and discrete latent states), dynamic linear models, hierarchical models, quantitative finance.

Publications

Published

- **Damiano L.**, Peterson B., Weylandt M. (2018) “*A Tutorial on Hidden Markov Models using Stan.*” Zenodo. (DOI [10.5281/zenodo.1284341](https://doi.org/10.5281/zenodo.1284341)). Accepted for publication in the proceedings of [StanCon 2018](#) and invited to present.

¹The U.S. equivalence, which is self-reported based on [WES Country Resources](#), is provided for indicative purposes only.

²Students are allowed to complete all Ph.D.-level coursework prior to formal application to the Ph.D. program. After admission, candidates focus exclusively on their thesis and do not take additional courses.

In Preparation

- Ward E., Anderson S., **Damiano L.**, Hunsicker M., Litzow M. “*Modeling regimes with extremes: the bayesdfa package for identifying and forecasting common trends and anomalies in multivariate time-series data.*” Intended for [The R Journal](#).

Published Software

Published

- Ward E., Anderson S., **Damiano L.**, Hunsicker M., Litzow M. “*bayesdfa: Bayesian Dynamic Factor Analysis (DFA) with ‘Stan’.*” An R Package available on CRAN. ([Link](#))

In Preparation

- **Damiano L.**, Peterson B., Weylandt M. “*BayesHMM: Full Bayesian Inference for Hidden Markov Models.*” An R Package intended for CRAN. Work in progress as part of GSoC 2018. ([GitHub repository](#))

Presentations

R/Finance 2018, Chicago, IL

June 2018

- “*Bayesian Inference and Volatility Modeling Using Stan.*” Optional pre-conference tutorials with Michael Weylandt. 28 attendees. ([Slides](#))
- “*Hierarchical Hidden Markov Models in High-Frequency Stock Markets.*” Full talk. ([Slides](#))

Inter-American Statistical Conference 2017, Rosario, Argentina

October 2017

- “*Daily Stock Price Forecasts in Argentina Using Hidden Markov Models.*” ([Slides](#))

Artificial Intelligence in Industry and Finance, Winterthur, Switzerland

September 2017

- Brian Peterson presented “*Regime Switching and Technical Trading with Dynamic Bayesian Networks in High-Frequency Stock Markets.*” ([Link](#)) as part of his keynote talk “*Machine Learning in Trading*”.

R/Finance 2017, Chicago, IL

May 2017

- “*A Quick Introduction to Hidden Markov Models Applied to Stock Volatility.*” ([Slides](#); [Notebook](#))

Research Experience

Universidad Nacional de Rosario

2016-2017

Graduate thesis for the M.Sc. in Applied Statistics program.

- Title: “*Evaluating Forecast Accuracy of GARCH Volatility Models Applied to Daily Stock Prices in Argentina.*” ([Thesis](#); [Slides](#))
- Advisor: [María Teresa Blaconá](#).

GSoC Student for R Project for Statistical Computing

Summer 2018

- Title: “*Full Bayesian Inference for Hidden Markov Models.*”

- Mentors: [Brian Peterson](#) and [Michael Weylandt](#).

R Package to run full Bayesian inference on Hidden Markov Models (HMM) using the probabilistic programming language Stan. We provide the user with an expressive interface to mix and match a wide array of options for the observation and latent models, including ample choices of densities, priors, and link functions whenever covariates are present. The software enables users to fit HMM with time-homogeneous transitions as well as time-varying transition probabilities. Implemented inference algorithms include forward (filtering), forward-backwards (smoothing), Viterbi (most likely hidden path), prior predictive sampling, and posterior predictive sampling. Convenience routines for convergence diagnosis, goodness of fit, and data analysis are provided. ([GitHub repository](#)).

GSoC Student for R Project for Statistical Computing

Summer 2017

- Title: *"Bayesian Hierarchical Hidden Markov Models applied to financial time series."*
- Mentors: [Brian Peterson](#) and [Michael Weylandt](#).

Investigation of full Bayesian posterior inference (MCMC) for Hierarchical Hidden Markov Models (HHMM) with applications to financial time series. Contributions included: Development of specialized priors to smooth posterior geometry and improve MCMC convergence; Adaptation of forward-backward and Viterbi algorithms to HHMM; Efficient implementation of Hamiltonian Monte Carlo for HHMM, suitable for high-frequency financial time series. ([GitHub repository](#); [Link](#))

Teaching Experience

Co-Instructor

Universidad Nacional de Rosario, Department of Statistics

Spring 2018

Time Series Analysis (graduate level): Stationary ARMA Processes, Models of Nonstationary Time Series, Seasonality, Maximum Likelihood Estimation, Diagnostics and Model Selection, Forecasting, Intervention and Detection of Outliers. Introduction to State-Space Models. Instructor: M.T. Blaconá.

Teaching Assistant

Pontificia Universidad Católica Argentina, Department of Administration

Fall 2010

Finance II (undergraduate level): Valuation and Capital Budgeting, Return and Risk, Capital Structure and Dividend Policy. Instructor: G. Messina.

Professional Experience

[FIRST Capital Markets](#), Head of Asset Management, Buenos Aires, Argentina

2015-2018

Development of quantitative strategies and deployment of GARCH for foreign exchange volatility, PCA of the yield curve, cross-sectional and time-series analysis on currency futures, Monte Carlo simulation to model delta-neutral commodity trading strategies, and hierarchical linear models for cohort analysis of credit portfolios.

[FIRST Corporate Finance](#), Lead Structurer for ABS, Rosario, Argentina

2010-2015

Deloitte & Touche Corporate Finance Advisors prior to the spin-off in 2013. Primary responsibilities included structuring Asset-Backed Securities (ABS) as well as producing all the technical documents for the initial public offering. Quantitative aspects of the daily work included the statistical analysis of the historical performance of assets, handling databases with 100 million records, and forecasting cash flows.

Personal Details

Citizenship

- Argentinian, Italian (dual).

Languages

- *Spanish*: Native.
- *English*: Full professional proficiency.
TOEFL Internet-based test: Reading 30, Listening 30, Writing 27, Speaking 24, Total 111 (2017).
Certificate in Advanced English, Council of Europe Level C1 (2009).
First Certificate in English, Council of Europe Level B2 (2008).
- *Italian*: Limited working proficiency.
PLIDA Certificate, Council of Europe Level B1 (2005).
- *French*: Limited working proficiency.
More than 700 hours of coursework in the Alliance Française, Rosario.
